

Setting Up Your Google Listing

Dr Aliaksandr Mudrakouski · alexpainclinic.ie

This creates the listing that appears on Google Maps and in the box of results at the top of a Google search. For searches like “*pain clinic Dublin*”, most patients click there rather than on the website links below it — so this is the single most valuable step in getting the practice found online.

It takes about 15 minutes. It must be done from your own Google account, because Google verifies that you are genuinely at the address, so unfortunately it cannot be done on your behalf.

Before you start

Have these to hand:

- A Google account (a Gmail address). If you would prefer a separate one for the practice, create it first at accounts.google.com.
- Your mobile phone, for the verification step.

Step 1 — Check whether a listing already exists

Google may have already created an entry for you from your hospital and insurer profiles. Claiming an existing one is much better than creating a second.

1. Open google.com/maps
2. Search for **Aliaksandr Mudrakouski**
3. If an entry for you appears, click it, then click “**Claim this business**” and continue to Step 3.
4. If nothing appears, continue to Step 2.

Step 2 — Create the listing

1. Go to google.com/business and sign in.
2. Click **Add your business to Google**.
3. Enter the details exactly as printed below — they must match the website word for word, or it counts against us on Google.

Business name	Dr Aliaksandr Mudrakouski — Pain Management
Business category	Pain Management Physician
Address	Suite 5, Beaumont Private Clinic Hospital Road, Beaumont Dublin 9, D09 Y177
Phone	085 713 3548

Website	https://alexpainclinic.ie
Opening hours	Monday to Friday, 8:00 – 19:00 (add Saturday if you wish to show it)

When asked “Do you want to add a location customers can visit?” — answer **Yes**, and enter the address above.

Step 3 — Verification

Google now confirms you are really at that address. It chooses one of the following — you do not get to pick.

By postcard. A card with a code arrives at the clinic in about 1–2 weeks. Enter the code when it comes.

By video. You record a short continuous video on your phone: the building sign showing the address, then walking to your suite door showing the number, then inside the room. Nothing needs to be said.

Please note

Do not change the address after requesting a postcard — it cancels the code. Nothing appears publicly on Google until verification finishes, so it is worth starting this sooner rather than later.

Step 4 — Give us access

This lets us keep the listing updated for you. You remain the owner throughout and can remove access at any time.

1. Open your listing at **business.google.com**
2. Click **Settings**, then **People and access**
3. Click **Add**, and enter: **[YOUR EMAIL ADDRESS HERE]**
4. Choose the role **Manager** — not Owner
5. Click **Invite**

Once finished

Please send us the link to your listing, and we will connect it to the website so that Google recognises the two as the same practice.

Any difficulty at any step, send a screenshot and we will talk you through it.
